

Alex COIRET, Ph.D.

✉ alex.coiret@univ-eiffel.fr
🌐 <http://www.univ-eiffel.fr>

introduction

After a PhD thesis focused on fluid dynamics and acoustics (1999) in the civil engineering field, I put my competences in dynamics, fluid mechanics, experiments and simulation into application to the transportation domain, by joining in 2001 the french road and bridges laboratory (LCPC).

Starting from tire-to-road grip to vehicle handling and road safety, my researches have been more focused on transportation energy savings since 2011, concomitantly with the merging of Inrest and LCPC into the Ifsttar institute. My research field became then the use phase of transportation infrastructure, whether for railways and roads. General aim is the reduction of use phase energies, due to traveling of trains or road vehicles, by means of a better infrastructure design or exploitation.

Since january 2020 the institute I belonged to is now part of the new french Gustave Eiffel University.

Employment History

- 2020 – └ **Senior researcher.** Gustave Eiffel University, Nantes Campus, Bouguenais.
- 2011 – 2019 └ **Researcher. (energy, infrastructure, transportation)** Ifsttar, French science, network and transportation institute, Bouguenais, France.
- 2001 – 2011 └ **Researcher. (road safety)** LCPC, French road and brigdes central laboratory, Bouguenais, France. I
- 2000 – 2001 └ **Post doctorate.** CSTB, french building research center, Nantes, France.
- 1999 – 2000 └ **Research and teaching assistant.** La Rochelle University, France.
- 1996 – 1999 └ **Assistant teacher.** Mechanics, optics, acoustics, reinforced concrete; master level. La Rochelle University, France

Education

- 1996 – 1999 └ **Ph.D., Poitiers University, France** Civil Engineering.
Thesis title: *Experimental study on flow noise reduction using stable paths of bifurcation.*
<https://tel.archives-ouvertes.fr/tel-02166666/document>
- 1995 – 1996 └ **Postgraduate Degree (DEA), Poitiers University.**
- 1995 └ **M.Sc. Civil Engineering, Poitiers University.**

- 2016 – 2019, Ph.D. Thesis
- **Emir Deljanin**, "Eco-driving potentiality of road infrastructures according to the adequacy between infrastructure geometrical characteristics and vehicles speed" (manuscript in english, supervision rate 50%), defense: september 20, 2019, Nantes University, France and Sarajevo University, Bosnia-Herzegovina (co-supervision).
<http://archive.bu.univ-nantes.fr/pollux/fichiers/download/7b30e491-1115-4e4b-8aeb-c2219c2def2a>
- 2018 – . . . , Ph.D. Thesis
- **Martin Fontaine**, "Étude théorique et expérimentale pour le développement d'un système de pesage embarqué dans un pneu" (supervision rate 30%), Nantes University, France.

Research administration

- 2006 – 2009
- **Administration of a large research project:** "Controlability" Research, about road/driver/vehicle controlability. Research administrated over 4 years; organisation of 13 meetings and 2 plenary seminars (about 100 attendees, feb. 2008 and sept. 2010).
2006 budget: 524k€, including human resources (204 men-months).
2007 budget: 637k€, including human resources (51 men-months).
2008 budget: 2281k€, including human resources (188 men-months).
2009 budget: 1835k€, including human resources (157 men-months).
131 productions, whose: 6 Ph.D. thesis supervision, 14 journal articles, 29 conferences communications, and reports, and equipment and software developments.

Research administration (continued)

2011 – 2015

- **Administration of half of a research project:** Collaboration project between my laboratory and RFF (French railway network). Global budget of 400k€, including a Ph.D. funding. Productions: full-scale experimentation with high-speed trains; train energy model; Ph.D. manuscript, journal articles, communications and technical reports.

Research contributions

2002 – 2006

- **SARI-IRCAD, French national project (PCRD):** Contribution, National research project, budget of 2194 k€, vehicle to infrastructure communication, author of the technical report: "Glaser S., Mammar S., Coiret A., Dufresne M., Modèle Paramétrique et Domaines de Stabilité, SARI-IRCAD project, WBS 1.7.1., may 2006, 42 pages".
http://sari.ifsttar.fr/livrables/ircad/IRCAD_1.71.pdf

2003 – 2006

- **SARI-RADDAR national project:** Contribution, French National research project (PCRD), budget of 3498 k€, vehicle handling, author of the technical report: "Coiret Alex, Représentativité de mesures dynamométriques liées à l'infrastructure vis-à-vis de mesures dynamométriques embarquées, SARI-RADARR project, may 2006, 46 pages".
http://sari.ifsttar.fr/livrables/radarr/RADARR_3.1.2.pdf

2010

- **ROSE project, Denmark, "ROads Saving Energy":** Collaboration on a Danish project. "The objective of ROSE is to reduce the vehicle rolling resistance by 20% compared to the average level for present Danish road pavements". Partners: two universities (RUC, DTU), the Danish and French government road-research organizations (VD, IFSTTAR), and five private companies (NCC Roads A/S, Greenwood Engineering A/S, Continental AG, Total Bitumen, AfterMath). Total budget: 4 M€. Ifsttar budget: 335 k€. My contribution: article draft and submission: "influence of crossfall on vehicle consumption".

2014 – 2015

- **Nova-TP regional project:** bicycle lanes. Partners: Nantes-Métropole (city), Ifsttar (me and 3 colleagues), SCE / Keran, Eiffage, Charier TP, Novabuild. My contribution: Two technical reports (grip measurement of bicycle lanes, structures of lanes), two communications to the international conference VELOCITY2015 (Nantes, France).

2020 – 2021

- **Nantes-Métropole:** research project, allowed budget for SII laboratory: 4.5 k€. Road eco-conception. Partners: Nantes-Métropole (city), Gustave Eiffel University, Egis. My contribution: Two technical reports (methodology and results).

Expertise

2013 – 2015

- **Autonomous Metro of Toulouse city, France:** Expertise Management and contribution. Customer: TISSEO, metro network operator of the Toulouse city (France). Duration: 36 months, Budget 38.5k€. Personnal tasks: Administration, Participation to the writing of 6 out of the 10 technical reports delivered to the customer, First author of a journal article (RTS, Coiret 2017 in publication list), full-scale experiments: 3 missions.

2017

- **Rouen Metropole, France** Boat trajectories expertises prior to the building of a light bridge. Budget: 11700 €, duration of 8 weeks. Personal tasks: data analysis (matlab, R), final report contribution (32 pages), author of a journal article (8 pages, RTS journal, Lorino 2020 in publication list).

Fields of competence

Experimentations	road pavement instrumentation (deformations, contact forces), vehicle instrumentation (GPS, wheel forces measurements, optical sensors Aquasens or correvit, laser).
Data analysis	Matlab/simulink, Scilab, R
Numerical Modeling	Fluid dynamics (Fluent), vehicle dynamics (Carmaker, Callas),
Programing	C++, R, bash, python
